TIMPERLEA

ANGUS STUD

TIMPERLEA ANGUS

WELCOME TO

TIMPERLEA ANGUS STUD

Winter is almost over, and we are approaching spring yet again. This time of year keeps us busy and we almost feel as if the seasons merge into one. The weather has been unpredictable across most of the country, but it appears to not have affected the quality of cattle produced.

This year our 'V' crop of calves is up for sale and from weaning they have been the tightest and most even line I have ever produced. It has therefore been a privilege to pick the sale line for my clients. I am excited to see how these yearling bulls will grow into strong sires.

When you look the sire team we have used, there is a good amount of strength and power in the cow lines of those sires. We have been focusing on keeping our strong fertility traits, as well as increasing our growth and carcass attributes.

Our females that stay in the herd must be structurally and phenotypically correct, get in calf every year within two cycles and produce and wean strong offspring. They must retain their condition by predominantly only cleaning up pastures within the wider picture of our entire farming operation. My strong dam families are testament to why I enjoy breeding Angus. A good steak doesn't hurt too!

This season I have had the privilege of being asked to a few of your operations to have some input on selecting your female lines for retaining in herd. I've really enjoyed my time spent looking at what you are doing and speaking all things farming with you, and most importantly, getting to know what you're needing in your bulls. I thank you all for reaching out and your time on farm. From what I have seen, I believe this year our bulls will align with quite a few of your breeding objectives. We look forward to hosting you on farm this September.

Breeding Objectives

Currently the herd is at 145 breeding cows. The future for Timperlea Angus stud is to increase our herd size to 160 cows, develop performance proven bulls to increase genetic improvement and keep within the parameters of a strong genotype that also carries phenotype characteristics that contribute towards improving the New Zealand beef industry. We are aiming to increase our growth and carcass traits without compromising our maternal and calving ease traits we are well known for. Every year we A.I. our heifers and some of our top cows with sync A.I. The stud uses A.I. from New Zealand, Australia, Canada and America. Heifers are mated at 15 months of age and bulls are sold at 12 to 13 months of age, weighing between 460 and 530kg. We give our cattle two cycles each year. We do not cull on age, but cull on functionality, performance, and progeny.

As a family farming group, we are a closed herd, breeding mainly from A.I. or our own bulls. Any imported stud bull is quarantined and tested before introduction to our herd. We haven't shown cattle and returned them to the herd since 2016. The intent is to maintain a clean herd.

Bulls for Sale Today

- All bulls have tested BVD negative.
- All bulls have been BVD vaccinated.
- All bulls have passed semen evaluation and fertility testing carried out by Xcell Breeding Services Ltd.
- C10 TB status accredited herd.
- Group BREEDPLAN recorded bulls.
- Genomic data is available for all bulls

Conditions of Sale

1. All intending purchasers are required to register at the sales office prior to the sale. A purchasing rebate of will then be paid to non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchaser's behalf within 14 days.
2. Each lot becomes the property of the purchaser at the fall of the hammer.
3. Although every care has been taken to ensure the accuracy in compiling this catalogue no responsibility is accepted for any errors that may be included therein.
4. The vendor reserves the right to alter the order of sale at any time.
5. No warranty will be given by the auctioneer with any lot, and as all lots are open for inspection prior to the commencement of the sale, the same will be sold with all faults if any. No compensation shall be made in respect of any fault or error of description of any lots, however the vendors reserve the right to make compensation to a buyer if it is the vendors wish.
6. Leave full and explicit instructions in regards to transport.
7. Insurance: The auctioneers can arrange insurance on any stock.
8. If the purchaser wishes, bulls may be left on the vendors property at the purchasers risk, for a period following the sale.
9. PURCHASING REBATE: All intending purchasers are required to register at the sales office prior to the sale. A purchasing rebate of 6% on bulls will then be paid to non-participating livestock companies and recognized independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale. ARRANGEMENTS MUST BE MADE PRIOR TO THE SALE AND SETTLEMENT MADE ON THE PURCHASER'S BEHALF WITHIN 14 DAYS.
10. G.S.T: All bulls sold are G.S.T. exclusive.
11. All bulls remaining on farm 30 days post sale will incur grazing fees.
12. Any stud transfers will incur a \$500 dollar administration fee in addition to the sale price.

Health and Safety

Every effort will be taken by the Vendors, Rural Livestock Ltd, their staff and assistants, both on the sale day as well as any visits of inspection to ensure the safety of intending buyers and visitors. We wish however to advise that while this sale is run under normal management conditions, certain dangers exist in relation to livestock and their environment. Visitors should take care to ensure their personal safety. Please no children are allowed in the viewing pens.

SEMEN EVALUATION AND FERTILITY TESTING

Xcell Breeding Services semen evaluation and fertility testing is a practical method used worldwide to eliminate bulls with less than satisfactory breeding potential and is part of our procedure to demonstrate normal reproductive ability. Xcell Breeding Services uses this safe and reliable method to assist the breeder in their desire to produce quality animals.

The evaluation consists of:

- Palpation and examination of the testicles, the testis should be firm, equal in size with no palpable abnormality and have scrotal diameter in keeping with industry standards.
- The penis and sheath are examined for any apparent abnormality e.g. sores, lacerations, abscesses, hair rings, warts, cork screw, penile frenulum, scar tissue, signs of damage. During electro stimulation the penis must extend from the sheath, straight in the midline of the bull.
- Microscopic evaluation of a semen sample for Motility (% of live sperm within the sample) and morphology (% of normal vs. abnormal sperm within the sample).

All the above information is considered and, where there is any departure from normal the bull is either failed outright or re-evaluated at a later date.

Each bull presented by **Timperlea Angus** has undergone Xcell Breeding Services semen evaluation and fertility testing on **27 August 2025**.

Greg McKay, General Manager

Disclaimer: As the testing is often done some months prior to the bull being joined, it is important to appreciate that subsequent ill health or injury may render the animal either temporarily or permanently infertile.

It is important to observe young bulls working and it is good practice to back up mate with a proven sire after 2 cycles to cover the possibility of any possible subsequent temporary infertility.

TIMPERLEA ANGUS BREEDING SEASON CHECKLIST

Aiming for better outcomes this season?

Well managed cattle perform better and considering these things prior to mating will make a difference.

Set your breeding objectives to align with your business goals

Speak to your local vet about herd health and fertility considerations. Speak about what results you should expect.

Vaccinate (and test if need be) cows for all locally relevant diseases (eg. BVD, IBR)

Decide what bulls you will use and have a breeding soundness exam completed. Older bulls should be tested and rechecked.

Ensure any nutrition changes have been made at least 8 weeks before mating (including lick blocks, minerals, diet)

Animals should be on a rising plane of nutrition leading into any form of mating. Open up cattle 4-6 weeks out from service date. Feed given during this period will give you the biggest return.

Angus NZ EBV's Explained

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. TACE information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT ANGUS NEW ZEALAND SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Identify the **Angus New Zealand selection index** of most relevance to you.
2. **Rank animals** using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here www.angusnz.com.

TRANSTASMAN ANGUS CATTLE EVALUATION

The Angus New Zealand Association publishes the following TACE EBVs and Selection Indexes. Please note that only EBVs from the same TACE analysis can be directly compared.

More information, including EBV descriptions and how to use them, can be found in the **Using & Understanding TACE EBVs** booklet. Scan the QR code for details.

FMG Premier Bull Sale Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser. For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the

“Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at 7.6% of the purchase price (the sum insured for the bull). If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

✓ Infertility

Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, or illness.

✓ Theft or death

We cover your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).

✓ Vet costs

We cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Bull Purchaser Instruction and FMG Insurance Slip

Please complete this slip and hand to the Booking Clerk before leaving the sale. This slip **MUST** be fully completed to be eligible for the 14 days free Premier Bull Insurance.

Purchaser/Agent full name:	If purchasing on behalf of, what is your relationship to owner?			Buyer No:

Period of FMG Insurance

☐

Tick here to extend your Bull Insurance to 12 months @ 7.6% of the purchase price of your bull. *This will extend the cover beyond the initial 14 days free cover for the remaining period of 12 months.*

If you do not wish to be contacted by FMG in the future to discuss other products and services please tick here: ☐

I acknowledge and agree for my personal information contained in this Purchaser Instruction and Insurance Slip to be shared between the parties involved in this bull sale, including but not limited to the vendor or their representatives, livestock agencies, transport operators and FMG. The information is shared for the purpose of completing the sale and purchase of the bull, including insurance with FMG.
