Every care has been taken in compiling this catalogue, however
no responsibility will be taken for any errors or omissions.

**All Cattle bred on the property, only Stud Sires are
purchased from reputable breeders.**

60 years at Pyramid Downs

Polled Hereford Cattle originated in 1972, by purchasing in-calf commercial heifers. The stud was founded in 1979 when females from the Broadacre Stud dispersal of polled cattle, joined the herd. In 1980, in-calf heifers were purchased from the Highland Stud.

Currently, 100 odd breeding cows plus heifers are wintered, calving during September. Emphasis is placed on Breedplan data, structural soundness and improving cow efficiency and performance. The genetic combinations have contributed to increased milk figures.

The ability of these Bulls to add value to your operation is the result of over 54 years' experience in breeding Polled Herefords. This line-up of Bulls represents the consistency that we continually strive to achieve.

I look forward to meeting you on Sale Day.

Helen Miller
