

# FINISHING PACKAGE

Rural Livestock Ltd is proud to introduce a specialist livestock finishing package in collaboration with Catalyst Performance Agronomy, designed to maximise livestock finishing and profitability. Through this partnership, Rural Livestock will supply high-quality stock, while Catalyst will provide a high-performance seed mix, agronomy services, and grazing advice to ensure optimal stock finishing.

Rural Livestock have options available to finance the livestock purchases\*, until the stock are processed. There are also options available to finance the cost of the innovative seed mixes provided by Catalyst Performance Agronomy, until the stock are processed. These seed mixes are specifically formulated to promote rapid liveweight gain and meet consistent carcass specifications. Additionally, the package includes ongoing access to an agronomist and farm systems expert to ensure everything runs smoothly.

Finance arrangements can be tailored to meet your requirements, allowing you to focus on farming while boosting your profitability!

*\*excluding animal health and transportation. Terms, conditions and eligibility apply.*

# FINISHING PACKAGE

## SUMMER FINISHING MIX

**SOWING RATE: 17 KG/HA**

This premium blend of Italian ryegrass, chicory, and Persian clover is ideal for livestock finishing in New Zealand:

- Clara Italian Ryegrass: Fast-growing, energy-rich for quick weight gain.
- Angus Chicory: Palatable, mineral-rich for enhanced growth and health.
- Allure Persian Clover: Protein-packed, boosts soil nitrogen and pasture productivity.

Perfect for maximizing weight gain and carcass quality.

**\$146.42 / ha ex. gst**

## WINTER FINISHING MIX

**SOWING RATE: 26 KG/HA**

This specially formulated blend of Italian ryegrass, forage rape, and Persian clover is ideal for livestock finishing in New Zealand.

- Clara Italian Ryegrass: Fast-growing with high cool season growth.
- Mainstar Forage Rape: High-yielding, great quality, and excellent for winter grazing, boosting feed intake and increasing winter carrying capacity
- Allure Persian Clover: Protein-rich legume that enhances soil nitrogen and production. Persian clover provides cool season legume content.

Perfect for farmers aiming to improve weight gain and carcass quality, but with the added flex of the brassica for winter carrying capacity.

**\$142.56 / ha ex. gst**

## 3-4 YEAR FINISHING MIX

**SOWING RATE: 26 KG/HA**

This mix of hybrid ryegrass, chicory, plantain, white clover, and red clover offers consistent performance for 3-4 years, ideal for finishing stock in New Zealand:

- Splice AR1 Hybrid Ryegrass: Durable, high-yielding base.
- Angus Chicory: Mineral-rich, enhances feed quality.
- Endurance Plantain: Nutritious, supports health and longevity.
- Sophie White & Ruby Red Clover: Boosts soil fertility and productivity.

Perfect for long-term finishing, ensuring strong growth rates and improved carcass quality.

**\$262.93 / ha ex. gst**
