

CAIRNLEA

POLL DORSET STUD

— ESTABLISHED 1974 —

18th annual on farm sale

Inspection from 11am

Sale begins 1.30pm

Friday 12th December 2025

**233 Auripo Road Poolburn,
Central Otago**

WELCOME TO OUR CATALOGUE FOR 2025'S RAM SALE.

This time last year we celebrated 50 years of breeding top quality Poll Dorset sires and our supposed departure from the industry. Well we are still here at this stage, but looking to move on in the near future with any luck. So this is the last last sale. We are still hopeful of selling the stud locally and will be advertising this in November and December however if we cannot find a buyer then we look to have a dispersal sale sometime in February. We would like to thank our clients for their continued support during our time running the stud and after talking other breeders in the Southern area there will definitely be rams available in the coming years.

EMA (Eye Muscle Area)

The EMA is a measurement of the loin which gives an indication of the meat yielding properties of the rams. A higher number here is desirable, in the sale catalogue this year the best Poll Dorset was 28.2 The lowest in the sale is 15.7. The average this year is down on last years' average of 23.99 to 20.86, due to the rams drinking from a dirty water hole in late summer.

WWT and 200 Day WT:

These are our growth indicators: lambs are weighed at weaning, in late December and again in March when we eye muscle scan. The average weaning weight for this year's rams was 38.6 kg and the 200-day weight, or LW8 was 63kgs. These numbers are slightly back on last years weights.

IMF

We are continuing to measure an Intra-Muscular Fat score, IMF for short. This relates to the eating quality BV's from Australia, where there is a real push for this trait. This score is a visual appraisal done at EMA scanning and is ranked from 1= Top to 5 = Poor.

SU Rams

This year we are offering 22 Suffolk X rams. We have changed Sires for this year using a ram from the Phoebe stud in Canterbury. He is deep thick set ram with solid bone underneath. His progeny share the same qualities and the rams for sale this year have great depth and bone with good growth rates and scanning figures.

Poll Dorset Sire Summary

The list below is a reference to the sire used for each ram in the sale. We are pleased to be able to offer sons of our latest Gooramma (228/22) semen purchase from Australia. This ram was bought in conjunction with Brendon Wilkins from Wendonside and his father Valma "Lyle" is in the top 5% for eating quality. We also entered another Gooramma son 2/20 into the eating and yield quality trial at Duncraigen, this ram topped the tenderness score on the raw data, and it will be interesting to see how the results of this trial are used and whether any worthwhile premiums are forthcoming.

Gooramma 228/22 (S) (A.I. Sire)

This ram has a smooth shoulder setting and a clean body shape. He is a medium framed ram with an exceptional IMF, at the time of purchase in 2023 he was in the top 3% of Australian rams for this trait. We believe that the eating quality and tenderness traits that this ram represents will be of importance to the NZ sheep industry in the future. This ram features strongly in the top half of the sale with good EMA scans and growth rates to go alongside his good IMF genetics.

Cairnlea 382/20 (TW)

A very deep home bred ram, who is good and square on his feet. His EMA was 27.7 in 2021 with a weight of 75kg. He has an IMF of 3. His Grandfather was Longlee 122/17, who has bred a lot of sheep for us with good bone underneath and correct shape.

Cairnlea 386/21 (S)

The son of Windermere 97/16 who we used for the last few years. A grunty ram with an exceptional EMA scan of 27.4 at a liveweight of 82.5 kgs. He is a good correct ram who performed well at the local shows which included winning Supreme Champion at the Mt. Bengier show in February 2023.

Windermere 209/20 (TW)

A very deep ram, moderate framed ram who has added some real punch to our EMA figures. He is correct on his feet with a good hindquarter. In our EMA scanning results he has continued to perform well and has mixed well with our Gooramma daughters to produce quality thick set rams.

Windermere 418/22 (TW)

Bought in conjunction with Brendon Wilkins, and used as a cover sire for the A.I. ram last year so will have limited impact on this sale. He is nice correct medium frame ram who we have used again this year as a stud sire in his own right, it will be interesting to see how his progeny perform after weaning this year.

Cairnlea 42/23 (S)

This ram lamb had an impressive EMA of 28.8 and really good growth off mum, gaining around 250gms per day. A son of our home bred 382/20 who has bred exceptionally well for us over the years. Interestingly enough this ram didn't make the sale last year, reckon someone who bought the rams who had lost their tags got themselves a bargain.

Cairnlea 193/23 (S)

Sold as a stud ram last year for \$5,500 to the North Island. This ram was correct on his feet had a well-proportioned frame and with a massive 33.2 EMA scan was one of the best sheep bred here at Cairnlea.

Hopefully you find this information useful.

We have changed the format of the catalogue slightly and the sire is shown for each ram with its catalogue data.

If a ram is in the Suffolk X part of the sale with a different tag, it simply means that it was born late.

We look forward to seeing you in December.

Regards,
Sam and Deb Stevens

Declaration: I am the person in charge of these animals and I declare that I have read and understand the requirements for this ASD and that the information that follows is true and accurate.								TBfree herd no or LIC MINDA code (cattle and deer only)	
Signature (person in charge)				Address animals moved from (Rapid number, road and town/district)				NAIT number	
Name (person in charge)				Owner's postal address (if different from above)				Phone 021 679 934	
Owner/Trade name (if different from person in charge)				Email				Fax	
Description (e.g. breed, age (e.g. R1, R2, R3), ID, etc)				Date 12/12/2025					
Destination (e.g. name and location of processor, saleyard or farm destination)									
Stock type				Tallies					
Description (e.g. breed, age (e.g. R1, R2, R3), ID, etc)				2 TOOTH RAM					
Destination (e.g. name and location of processor, saleyard or farm destination)									
1.0 Withholding periods – all animals (see note 1 of the requirements)									
1.1 Are any of these animals within the withholding period of any treatment?									
yes <input checked="" type="checkbox"/> no <input type="checkbox"/>									
If Yes, state the product name, method of treatment, the date of the last treatment and the withholding period of the treatment (days).									
(NB: these animals are NOT eligible for slaughter for human consumption; they are eligible for slaughter for animal consumption but must be categorised as medium risk material).									
Product name		Method of treatment		Date of last treatment		Withholding period			
TROSS TRIPLE		ORAL DRENCH		5/12/2025		10 DAYS			
2.0 Animal history – all animals (see note 2 of the requirements)									
2.1 Were all of these animals born on your property?									
yes <input checked="" type="checkbox"/> no <input type="checkbox"/>									
2.2 Were any of these animals imported into New Zealand?									
yes <input type="checkbox"/> no <input checked="" type="checkbox"/>									
2.3 Are any of these animals from either an MPI surveillance listed property or under MPI control for residues or any purpose other than TB?									
yes <input type="checkbox"/> no <input checked="" type="checkbox"/>									
3.0 Animal feeding – cattle, sheep, lambs, goats, deer, alpacas, llamas (see note 3 of the requirements)									
3.1 Have any of these animals been fed ruminant protein in their lifetime (see description of ruminant protein)?									
yes <input type="checkbox"/> no <input checked="" type="checkbox"/>									
3.2 Have any of these animals been fed ANYTHING OTHER than milk or pasture in their lifetime (see description of 'Pasture/grass fed')?									
yes <input type="checkbox"/> no <input checked="" type="checkbox"/>									
4.0 Johne's Disease vaccination – where applicable (see note 4 of the requirements)									
4.1 Have any of these animals been vaccinated against Johne's disease in their lifetime?									
yes <input type="checkbox"/> no <input checked="" type="checkbox"/>									
5.0 Antimicrobial agent(s) (see note 5 of the requirements)									
5.1 Have any of the animals been treated with antimicrobial agent(s) in their lifetime for the sole purpose of promoting growth or to increase yield?									
yes <input type="checkbox"/> no <input checked="" type="checkbox"/>									
6.0 HGP treatment – cattle (see note 6 of the requirements)									
6.1 Have any of these cattle been treated with a hormonal growth promotant in their lifetime?									
yes <input type="checkbox"/> no <input type="checkbox"/>									
7.0 TB Declaration – cattle, deer (see note 7 of the requirements)									
7.1 What is the TB status of these animals? Enter status and index number									
7.2 Have any of these animals been tested while under your management?									
7.3 What is the date of the last TB test for these animals and was TB detected?									
7.4 What is the date of the last TB test for the whole herd and was TB detected?									
7.5 Is the herd under TB movement control? (If Yes, a permit is required unless going direct to slaughter)									
7.6 Are these animals being moved from a property within a Movement Control Area?									
7.7 If Yes, have these animals been tested within 60 days prior to this movement? (The 60 day test is not required if the animals are going direct to slaughter)									
I understand the obligations under the Animal Welfare Act of persons in charge of animals to ensure that their physical, health and behavioural needs are met in accordance with the minimum standards defined in Codes of Welfare under the Act									
8.0 Additional information (see note 8 of the requirements)									
HAVE YOU SIGNED THIS FORM AT THE TOP LEFT?
