

LA-MAC HAMPSHIRE

COMBINED ANNUAL RAM SALE
WEDNESDAY 10 DECEMBER
2025

POLL DORSET | HAMPSHIRE | SOUTH SUFFOLK

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr® representative:

WELCOME

Welcome to the 6th annual combined ram sale. We are delighted to present 115 purebred terminal rams from the La-Mac Hampshire, Lochaire Poll Dorset and Camla South Suffolk flocks. The Hampshire and Poll Dorset flocks are run on Ahuriri Farm, a 1,400 ha sheep and beef farm near Tai Tapu.

We are confident that within these pages lies a ram that will meet each of our clients' needs. Our breeding philosophy prioritises structural soundness and well-muscled sheep with a good constitution, ensuring our sheep are versatile and adaptable to different farming conditions, with lambs that are both fast-growing and high-yielding.

We look forward to welcoming you to this year's sale.

ACKNOWLEDGEMENTS

We wish to extend a big thank you to Peter, Anne and Simon Graham for allowing us to welcome you all onto Ahuriri for the ram sale.

Thank you to the businesses we rely on throughout the year for sponsoring our 2025 ram sale catalogue. We are grateful for your ongoing support.

- **DanScan Sheep Scanning:** We trust Dan with our scanning of the studs every year and are always impressed by his accuracy.
- **Farmfirst Vets Lincoln:** We work with Rob Dunbar and the team at Farmfirst for our whole-farm animal health programme and we value his knowledge.
- **Xcell Breeding Services:** Greg, Kylie and the team do our AI and ET programmes and we are looking forward to doing more exciting work in this space next year.
- **Farmlands:** Thanks to Paul Cooper for being my right hand in the agronomy space, with your valuable input helping us to continue improving.
- **DJ Webster Shearing:** Kelvin and his crew always do a top job of shearing the studs, particularly the rams which is no easy job.

Information in relation to the SIL performance data presented

Data presented in this catalogue on La-Mac, Lochaire and Camla rams, (SIL flocks 834, 37 and 1176) is from SIL GE analysis No.42783 NZ Terminal Worth dated 23 October 2025. The analysis periods are 1995-2025 and the number of flocks of analysis, 1475.

The data presented in this catalogue was provided with the assistance of NZ Sheep Breeders an approved SIL Bureau.

For further information, please contact: Nigel Jay 021 140 7827 | nigel.jay@actrix.co.nz

CONDITIONS OF SALE

1. This sale will be conducted under the New Zealand Stock & Station Agents Association Conditions of Sale. When proceeds are credited or a purchase is debited to a Hazlett Ltd or Rural Livestock Ltd account, the companies' terms and conditions apply to the extent deemed relevant. These terms can be inspected at the registration desk. The current versions of Rural Livestock Ltd and Hazlett Ltd terms and conditions are also available on their websites.
2. Each lot shall become the property of the purchaser at the close of the auction.
3. Finance are strictly cash prior to delivery of any animals unless prior credit arrangement has been made with the Auctioneers.
4. Although all care has been taken to ensure the accuracy of the information contained in this catalogue, Rural Livestock Ltd, Hazlett Ltd or bidr® and their employees do not accept any responsibility or liability as to mis-descriptions errors, omission or mis-statements either directly or indirectly by the negligence of the companies and/or their employees.
5. The sale will be conducted purchase price plus GST.
6. The on-farm auction site will be operating under the Health and Safety at Work Act 2015, when attending please first report to the registration area and familiarise yourself with the hazards identified on site and remain within the confines of the auction area at all times.
7. Transport: Leave full and explicit instructions in regard to transport.
8. Insurance: The selling agent can arrange insurance on any stock.
9. Transfer price of \$2,000 + GST applies.

OVERSEAS EXPORT

10. Prior to auction – Purchases who wish to export the animal/s ("Export Purchases") must advise the auctioneers at least 2 hours prior to the sale commencing that they are considering purchasing specific breeds at the auction. The Auctioneers will then advise all vendors of relevant breeds that their animals are being considered for export. Vendors not wishing to have their animals considered for export are to advise the Auctioneers.
11. Purchase at auction by Export Purchases is conditional upon the animal/s purchased passing all relevant export protocol and testing (conducted at the Export Purchase's expense). Full payment (plus GST) will be made at the fall of the hammer to the Auctioneers as per usual terms and conditions. Payment will be held by the auctioneers until the animal/s leave New Zealand. Payment will be refunded to the Export Purchases less all associated export costs for any animal/s purchased failing export protocol and testing. **ALL RAMS ARE VET TESTED AND ACCREDITED BRUCELLOSIS FREE.**

HEALTH & SAFETY

We wish to advise that certain dangers exist in relation to livestock and their environment. Every effort will be taken to ensure the safety of intending buyers and visitors, however, visitors should take care to ensure their own personal safety.

UNDERSTANDING SIL DATA

SIL (Sheep Improvement Ltd) is the New Zealand sheep industry's PERFORMANCE recording and genetic evaluation database. SIL estimated breeding value (eBV) and selection index information is provided in this catalogue to assist ram selection by giving the best estimate of genetic merit available.

Breeding Values Breeding values (BVs) are the best estimate of the animal's genetic merit for traits. They allow rams to be compared, with all rams included in the same analysis. Mostly, this means all rams from the same flock, but it can be used to compare animals from different flocks, if the analysis has been performed across these flocks. Breeding values are expressed in the units the traits are measured. For example, weight traits are in kilograms.

Indexes

An index provides a summary of overall economic breeding merit of animals. The economic value of each trait is summed to give a total economic value of the ram's genetics. The economic value of a trait depends on the production system; therefore a number of indexes are used to describe different systems. For example, the terminal sire index (NZTW) describes a system where all progeny are slaughtered. All SIL indexes are expressed as cents per ewe lambing.

Interpretation

BVs and indexes are a function of the population in which they are calculated. In most cases, they are only comparable within a single flock. Although across-flock analysis can allow values to be compared between several flocks, provided there are good genetic connections between the flocks. It is not possible to compare the genetic merit of rams from different flocks, unless the flocks have conducted an across- flock analysis and there are good connections between the flocks.

For every analysis, SIL sets 1995 as the benchmark year and the average genetic merit of lambs born in 1995 is set to zero. Therefore, the BVs are a measure of the merit of a ram compared to the 1995 average for that flock. If two flocks had different average genetic merit in 1995, the BVs would have to be adjusted for the difference to make them comparable.

eBV	eBVs (estimated breeding values) are expressed in units the trait is measured in, and are an estimate of the value of the ram's genetic merit for the trait.
WWT eBV	Weaning weight – "lamb growth".
LWt8 eBV	Body weight at 8 months of age – rates animals for postweaning growth.
EMA eBV EMAc eBV	Eye muscle area. Eye muscle area corrected for carcass weight – a measure of muscularity.
FAT eBV	Weight of fat in carcass.
NZTW Index	New Zealand Terminal Worth is expressed in cents and is an estimate of genetic value for growth (TSG), meat yield (TSM) and survival (TSS).
Rank	Ranks represent the position in the flock-birth year cohort of rams present at weaning (for WWT eBV), at autumn LW (LW8 eBV), at scanning (meat trait eBVs, NLB eBV & indexes) and at shearing (FW12 eBV).

INTRAMUSCULAR FAT (IMF)

The images below show the longitude view of the loin strap. The fat line at the top of each picture is subcutaneous fat which is the same fat we measured for Eye Muscle Area (EMA). The rounded tops in the middle is the top of the rib and lumbar.

For Intramuscular Fat (IMF), we are looking for colour in between the subcutaneous fat and rib tops. You can see from the difference between 1 and 3, there is a lot more colour in 3 and therefore, a lot more Intramuscular Fat. The Hampshire and Poll Dorset rams were scanned for IMF on 3 September 2025 by Peter Clulee, Otago Ultrasound Livestock Scanning.

Grade 1

Virtually no IMF

1

subcutaneous fat

rib tops

Grade 2

Slight IMF

2

Grade 3

Very high IMF

3
